

BK931

External heating electric soldering iron

1. The handle is made of nylon, which has high strength and good heat resistance;
2. Silicone sheath, heat insulation and non-slip, comfortable grip;
3. Black gold steel soldering iron tip, high temperature resistance, corrosion resistance. Wear resistance;
4. Small size, light touch, suitable for long-term operation;
5. Thick natural mica heating core, heating up quickly;
6. The power cord adopts the national standard three-core plug, high-soft material wire, high temperature resistance, aging resistance, soft and elastic.

Specifications:

Model	BK931
Operating Voltage	AC220/240V
Temperature range	450°C Not adjustable
Max output power	30W
Rewarming time	30S
Soldering iron tip specification/material	Solid head $\Phi 3.8 \times 70$ mm/black gold steel
Heater	Natural mica heating core
Weight	150g/190g
