

Wireless PC Oscilloscope

2 Channels, 70MHz Bandwidth, 250MSa/s Sampling Rate

Support WiFi to iPad, iPhone, Android, Windows

iDSO1070A

Features

- iPhone/iPad/Android/Windows Oscilloscope, Multi-touch Operation.
- WIFI Communication (USB Communication), WIFI Direct Connection/ Router Connection.
- Can be connected with iPad and iPhone at the same time. When operating on iPad, it can also be observed on iPhone.
- Waveform averaging, afterglow, lightness control, reverse, add, subtract, multiply, divide, X-Y display.
- Floating Measurement is available, safe and convenient.
- 70MHz Bandwidth, Real-time Sampling Rate 250MSa/s.
- Small size which is convenient for traveling.
- FFT spectrum analyzer.
- Build-in Lithium Battery, no need of External Power.
- More than 20 kinds of automatic measurement function, PASS/FAIL Check function.
- Software Support: IOS, Android (Partial function), Win10, Win8, Win7, VISTA, etc.
